# Preface

**We are proud to present the FEELGOOD By Brinker collection of 2022/2023! This catalogue, which has been completely redesigned, contains beautiful photos and inspiration. This collection includes new shapes, colours and structures that are based on the latest living trends. All made from precious, natural materials and with an eye for detail.**

The name FEELGOOD indicates exactly what we want to do: creating an attractive, homely and good feeling at home with the carpet playing the leading role. A carpet can be a determining factor or just the finishing touch. Either way, carpets create a nice, warm harmony in a room.

This collection has been developed with great care. We are convinced that this will allow you to enjoy your carpet for a long time. We mostly produce in-house, and we are proud of that. We have been producing carpets ourselves in Bikaner, India for two years now with a team of passionate and experienced weavers.

With our FEELGOOD Custom Sizes collection, you can put together a unique carpet in the shape, size and colour you want. Made especially for you with a warm greeting from the maker. We hope you enjoy selecting and putting together a carpet from FEELGOOD By Brinker.

# Feelgood Custom Sizes

The FEELGOOD Custom Sizes collection stands out from other collections. Curious about how we managed to do that? As the name suggests, a carpet from this collection can be put together completely according to your own wishes. Think of structure, colour and size. Entirely to taste, made from the best materials from India. These carpets are 100% custom-made, so there are no standard sizes in stock, unless they can be found in our Feelgood collection. This collection only aims for the highest quality and we are proud of that!

Arezzo ST

Do you have a rural or Scandinavian interior and are you looking for a carpet that fits perfectly with these soft colours? Or do you prefer a carpet that stands out and is the eye-catcher of your home? Everything is possible! In the FEELGOOD Custom Sizes collection, you can choose from thirteen different structures in many different colours. This way, you do not have to search endlessly for the right carpet. You can easily match the carpet to the room and the right ambience.

#### **Personal touch from the makers**

The yarns, structures and colours come from our own factory in India and are carefully composed by our highly experienced global design team. In addition, the FEELGOOD Custom Sizes collection is made entirely by hand. It comes beautifully packaged in a nice bag with a personal greeting and touch from the makers.

#### **Advantages: quality, fast delivery and choice of size**

The FEELGOOD Custom Sizes collection offers many benefits. As mentioned before, quality comes first, but we can also guarantee fast delivery. Thanks to our short lines and in-house collection, a custom-made carpet can be delivered within eight to fourteen weeks! The biggest advantage? There are no

standard sizes. So determine your own shape and size. Perfect! This makes choosing the right carpet a party, right?

# Shape, colour, structure

**Amalfi**

**Bari**

**Monopoli**

**Verona**

## How does it work?

- Choose your favourite texture
- Choose the desired shape (rectangle, square, round, oval or hexagonal) and see if this shape can be executed in the chosen structure
- Choose your favourite colour
- Choose the desired size that best suits your interior

**Bellano**

# Layering

## This year's interior trend: layering carpets!

Combining different carpets gives a surprisingly playful effect and is very trendy. In addition, it's also useful if you have trouble choosing!

That does not mean that you can just put anything together. The trick is to combine carpets, making it one.

Think of layering two carpets of the same material, but with a different shape and structure (like the example on the right). This way, you always go one step further.

## Determine the space

First of all, it is important to determine where the carpets will be placed. For example, if a room is already a bit full in itself, choose calm colours to keep it subtle. If a room needs to be spiced up a little, you can opt for a carpet with texture or more colours. Also the size depends on the room where the carpets are placed. A smaller room with many walls requires a smaller carpet than a large room with few walls.

## Which shapes?

**Round and rectangle:** this is one of the easiest options. You can place the carpets side by side or partially on top of each other. This immediately gives a playful look!

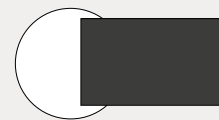

**Two rectangles:** the best result with this option is achieved by laying these carpets crosswise, so one vertically and one horizontally.

Then place them on top of each other. That's beautiful in, for example, the seating area!

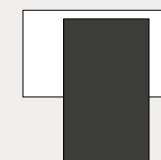

**Pebble and round:** the photo on the right already shows it: an organic pebble shape combined with a round carpet creates a nice balance. With these shapes, you can also easily add a round coffee table or ottoman, which ensures cohesion.

**Rectangle and pebble:** A pebble shape with a rectangle is a slightly more daring choice. The completely different shapes create contrast that you can keep very calm, but which you can also go a step further with, for example, by choosing the pebble in a bright colour.

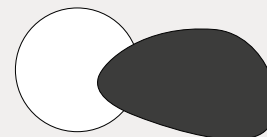

## ROUND AND RECTANGLE

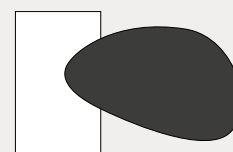

## TWO RECTANGLES

## PEBBLE AND ROUND

## RECTANGLE AND PEBBLE

Perugia & Orvieto

### **Combining materials and colours**

When you have determined the space and the shapes of your carpets, you can start looking at materials, colours and structures. Combining two different materials, colours and structures often scares people, while this can actually be really cool! Consider the following combinations:

- Two vintage carpets in different colours. Keeping the same pattern but playing with colours of the vintage look will give you a creative effect.
- A high pile combined with a low pile carpet. By choosing neutral colours but working with different pile heights, you keep the layering subtle.
- Tone-on-tone: choose one colour and have it come back in several shades. This creates unity in your interior. For a slightly more daring look, you can opt for different materials.
- Two shiny carpets in a different shape, like the example in the photo. This creates a chic and playful look.

# Feelgood by Brinker

The name FEELGOOD speaks for itself: carpets that make you feel good. We select carpets following our passion and produce them in India. A very big plus of the Feelgood collection is the fast delivery time of two weeks in the standard sizes. All items in the Feelgood collection are in stock in sizes 170 x 230 and 200 x 300. The Bellano ST is in stock in 200 round. A number of items can also be made to measure and in a different shape. In this case, the delivery time is as stated in the specifications.

The high quality and wide choice are characteristic of the FEELGOOD By Brinker collection. Due to the many colours and the extensive range, in both shape and size, we create carpets that perfectly match your personal wishes. Our team of skilled designers constantly strives to develop the most beautiful items according to the latest trends.

These items are made with a lot of passion and craftsmanship. The FEELGOOD By Brinker collection works with various selected yarns and materials such as New Zealand wool, cotton, polyester, recycled PET yarn, jute and viscose.

Experience the beauty and fun of the FEELGOOD By Brinker carpets for yourself.

Did you know that a round carpet can break the straight lines in your room? This ensures a beautiful contrast! Would you rather emphasize other round shapes such as round furniture or a conservatory? This also works well with round carpets. BELLANO is perfect for this. The braided design creates a beautiful atmosphere.

MODENA is one of our great eye-catchers in our new collection. This carpet has several colours, exactly according to the latest living trends. The wool threads are hand-knotted and consist of different thicknesses. This creates a clear, but subtle contrast. This quality consists of 100% wool and is made with a combination of four exclusive yarns.

If you are looking for an exclusive carpet with depth, our new PORTOFINO variant is just the thing for you. This carpet has a beautiful colour gradient thanks to the different colours. Together they create a striking and warm atmosphere. In addition to the multicolour version, this carpet is also available in a more subtle colour gradient, such as beige and grey. The quality consists of both wool and viscose, which gives it a beautiful, light sheen.

Carpet NEW PAULO is an old acquaintance of ours. We have given it a new look for this edition. Many colours have been added and the price has also been reduced. This high pile, shaggy carpet consists of eighty percent polyester and twenty percent wool. This material combination creates a beautifully lively and mixed effect. NEW PAULO is a perfect addition to any home due to the use of two different yarns. An extra plus is that NEW PAULO is easy to match with different colour elements, furniture and accessories. The hand-woven quality also provides a lot of atmosphere and warmth in the room!

The BRILLANTE is a shiny living carpet. The nap gives it its own character and look. The carpet is made with a yarn that we have developed ourselves. This Brincose yarn is a modified polyester, which means that stains have less chance to adhere.

# Wool

A woolen carpet is not only a pleasure to look at, but also wonderful to dream away on with a cup of coffee. A woolen carpet always feels nice and warm. Perfect for the cold winter months. Other advantages: wool is sound-absorbing and insulating. The thicker and larger the carpet, the greater the effect.

In addition, a woolen carpet is less sensitive to stains. A woolen carpet is dirt resistant due to its natural greasy layer. This makes it difficult for stains to adhere, which is of course a huge advantage! Another great property of wool is that it is naturally difficult to catch fire. As a result, a woolen carpet is more suitable near the fireplace. Nice and cosy with a beautiful look.

Do you think sustainability is important? Then a woolen carpet is an excellent choice. Due to the strength of the material, wool is not easy to break, which means you will enjoy this item for years to come. In addition, wool is easy to recycle and, unlike synthetic materials, it is much more sustainable and better for the environment.

# New - Zealand wool

New Zealand is the country of merino wool. It is therefore not surprising that there are more sheep than people. The merino sheep is also called the king of the sheep, because it produces the best quality wool. The fibres of this type of wool are long and incredibly soft. Due to the strong shrinkage, merino wool has a high elasticity and a relatively low shine. It is also very fine wool because the fibres have a thinner structure than those of ordinary sheep's wool.

Blended wool, on the other hand, is a mix of merino and coarse wool. Blended wool is not as curly as merino wool, but it does have the unique properties of pure new wool. Lovely, isn't it? It is not only used to make fabrics, but is especially popular for the production of home textiles.

# Carpets in different spaces

## Sitting area

With a carpet in your sitting area, you can go in all directions and create different styles. For a more open space, it is important not to put all the furniture on the carpet. This creates a separate residential island. By placing only the front legs of a sofa or chair on the carpet, the seating area forms a beautiful unity. This option is very suitable when the furniture is against the wall on one side. In addition, it has another advantage. The chance of tripping is limited, because the carpet is held back by your furniture!

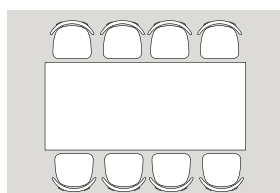

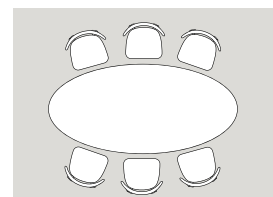

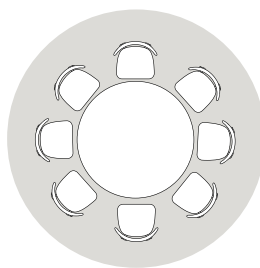

Arrezo

### Dining room

Would you like to place a carpet under the dining table? Then choose the same shape as the table itself! This ensures that you do not have any empty spaces on the carpet. The carpet should be at least 60 cm wider on each side - even better is 90 cm - because this way the legs of your chair always remain on the carpet. Applying a non-slip underlay is very smart in this setting.

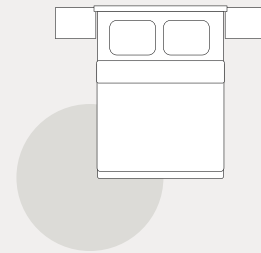

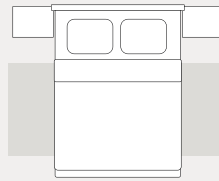

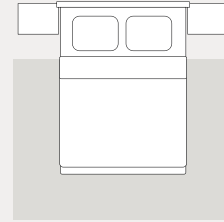

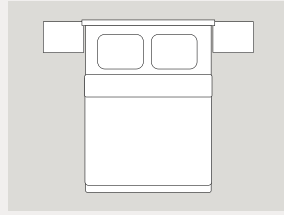

**TIP:**  
Put newspapers on the floor to determine the correct size of your carpet!

## Bedroom

A carpet in your bedroom provides atmosphere and warmth. Literally and figuratively. Finally, it is wonderful to step on a warm and soft carpet with your bare feet in the morning. Here too you can go in all directions. Do you put the carpet under the bed or do you place it next to it? And do you have a large bedroom? Then you can also put a large carpet under your bed. Make sure that the bed is in the middle, because that ensures the best result.

# New Vintage

No item of this patchwork carpets is the same. Unique in its kind. These carpets – sometimes eighty years old – are first deconstructed manually by real craftsmen in Turkey. Then they wash, paint, cut and reassemble them. The patchworks are made with attention to style and put back together by hand! A wonderful idea in the context of sustainability. We call that NEW VINTAGE.

# Polyester

Polyester is a synthetic material made from oil. For use in carpets, polyester is melted and formed into yarn. These yarns are used to weave the carpets.

The look and feel of polyester carpets can be compared to that of wool. This means that these carpets provide a warm, beautiful appearance in your interior. The colour and shape-stable material is also very sturdy.

The advantage of polyester carpets? They are cheaper than natural materials, easy to keep clean and easy to remove stains. Isn't that great?

# Viscose

When you think of viscose, you might think of silk. The comparison with silk is made because viscose looks a lot like it and feels about the same. The costs, on the other hand, are much lower. A viscose carpet is therefore one of the most trendy and affordable options at the moment.

Rome

Despite the fact that viscose is based on paper, the look and feel are not inferior to real silk. Because viscose is prone to wrinkling, the material in carpets is supplemented with natural materials such as cotton and wool. Another property of viscose is that it gives a nice shine to a carpet.

Due to the dynamic appearance, the incidence of light ensures that a carpet made of this material can look slightly different each time. Especially in combination with a beautiful design, a viscose carpet really adds something unique to your interior!

# BRINKER NON-SKID or NON-SKID DELUXE

For optimum comfort, durability and also safety, a non-skid carpet - which you place under the carpet - is a must. Brinkers non-skid carpet is suitable for any type of floor; parquet, wood, marble, tiles and PVC floors. A BRINKER NON-SKID or the NON-SKID DELUXE should not be missing under any circumstances, for the following reasons:

## **Lifetime extension**

Everyone wants their carpet to last, right? To make this happen, place the non-skid carpet in its entirety under the new carpet. In this way, there is little movement in the carpet and the structure remains the same and therefore beautiful for a longer period of time.

## **Resilience**

NON-SKID also increases walking comfort. Due to the resilience in the non-skid carpet, most forces are absorbed by the non-skid and not by the carpet itself.

## **Safety**

The name says it all: NON-SKID or anti-slip. It prevents you from

slipping on a loose carpet. And the formation of bumps under the carpet is also prevented, which limits the chance of tripping.

## **Discoloration**

Afraid that your floor will discolour due to the non-skid carpet? Not necessary! In some cases, such as oiled floors, epoxy floors, PVC floors and laminate, discoloration can occur. This is not due to the non-skid carpet, but these floors contain materials that cause discoloration. Even without anti-slip cover.

Installing a carpet with or without anti-slip is always at your own risk of discoloration and change of the sub-floor on which the carpet is placed.

## **Underfloor heating**

Do you have underfloor heating? Then always choose the NON-SKID DELUXE. Especially if the carpet contains latex. This prevents the backing from drying out and your carpet will last longer.

## **NON-SKID DELUXE for viscose carpets**

NON-SKID DELUXE is recommended for carpets with viscose or tencel yarns.

Brillante

**Summarising:**

BRINKER NON-SKID can be used with any type of floor, it gives virtually no discoloration and has a positive influence on the heat permeability of underfloor heating. It transmits the heat even better than if no anti-slip is used.

*\* The absence of a Non-skid has a major influence on the warranty of the carpet.*

**For more information about the BRINKER NON-SKID products, visit: [www.brinkercarpets.nl/maintenance](http://www.brinkercarpets.nl/maintenance).**

# Maintenance & stain removal

The cleaning and maintenance label James has developed a number of unique services to help you in every situation. One such free and unique service is “James’ personal maintenance advice”.

Brinker works closely with James. More than 115 different manufacturers, producers and suppliers have their quality products checked for use of James products. This also applies to Brinker, so that James can put together the right maintenance advice for the carpets.

#### **Cleaning with water**

James is the only manufacturer of cleaning agents that states on the James stain disc and on the website that 90 percent of all fresh stains can be removed with water! James Stain Wonder’s labels even state that you can use it, but that you must first perform a treatment with a damp cloth.

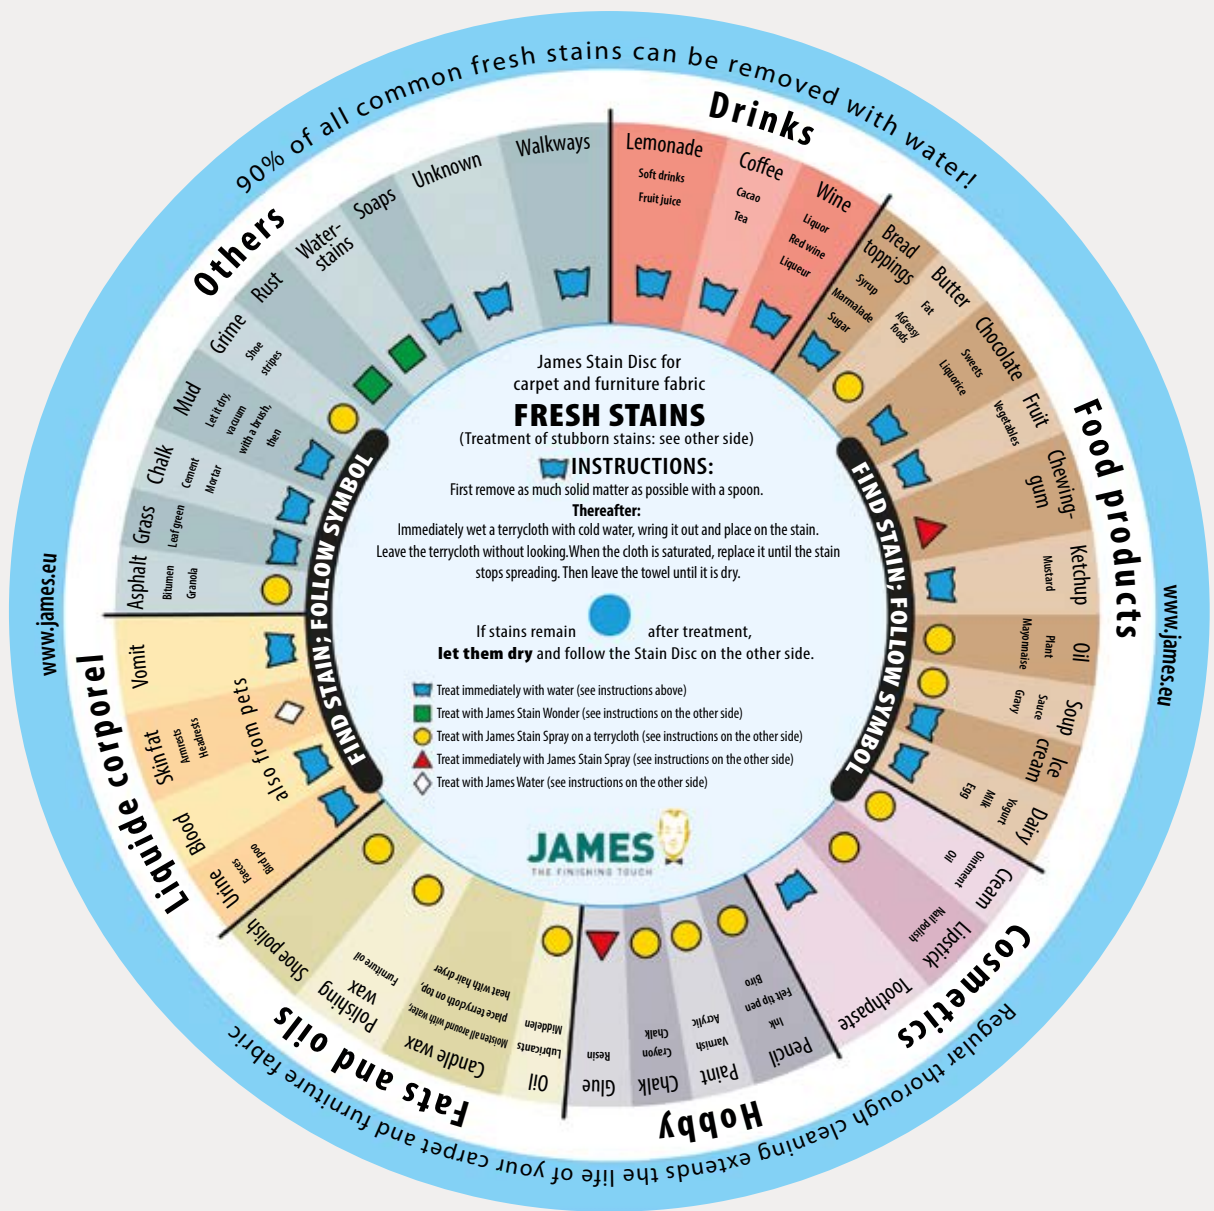

#### **Accurate dosing**

James always accurately indicates the dosage when applying the cleaning products. If you adhere to the regulations, the product will work optimally and your carpet will be spotless again!

#### **Avoid sharp objects**

In addition to following our cleaning and maintenance advice for your carpet, we recommend that you do not place pointy or sharp objects/ furniture on the carpet.
